Summary

I am a creative, passionate, and proactive Front-end Developer with 6 years of experience in building high-performance, scalable, and responsive web solutions. I have expertise in UI/UX, accessibility, SEO, and SOLID principles. Skilled in crafting eye-catching solutions, tailored to cover both user needs and business objectives. A problem-solver with attention to detail, excellent communication and negotiation skills, and a strong track record of collaboration. I am experienced in dynamic environments, eager to overcome challenges and reach targets.

Skills

- Frameworks and libraries: Vue 3 (Composition API), Vue Router, Vuex, Axios, Pinia
- Languages: HTML5, CSS3/SCSS, JavaScript (ES6+), jQuery, TypeScript
- Styling: Tailwind CSS v4, Bootstrap v5.3
- Familiar with Backend/API: Node.js, Express, MongoDB, Mongoose, REST, GraphQL, Firebase, Postman
- Tools & Testing: Vite, Vitest, Git, Bitbucket, Gulp, Swagger, Prism, JWT, Photoshop 2024, JIRA
- Deployment: GitHub, Netlify, Firebase

Certifications

- Mid Front-end Vue.js Developer – certificates.dev (in progress)
- Mastering Nuxt 2025 – masteringnuxt.com (in progress)

Experience

SBT Solution | www.sbtolution.com

Varna, Bulgaria

Front-end Developer

February 2026 – June 2026

- Development of responsive frontend components with Vue.js 3 (Composition API) and TypeScript.
- Building and maintaining dashboards, admin panels, and interfaces for AI tools.
- Implementation of designs from Figma/XD/PSD into well-structured, responsive solutions.
- Development of responsive interfaces optimized for all devices, resolutions, and browsers.
- Maintenance, improvement, refactoring, and performance optimization of existing frontend applications.
- Creating reusable components and applying best practices for better scalability and maintainability.
- Frontend integration with REST APIs, state management, and backend services.
- Implementation of authentication and authorization flows (JWT).
- Ensuring stable data flow and seamless integration with AI services and backend systems.
- Improving user experience, key user flows, accessibility, cross-browser, and cross-platform compatibility.
- Collaboration with backend, UX, product, and other teams for end-to-end feature delivery.
- Participating in UX reviews, QA feedback, and interface improvements.
- Writing clean, maintainable, well-documented code, according to internal standards and good practices.
- Documentation of frontend processes, components, and guidelines.
- Participation in code reviews and knowledge sharing within the team.
- Supporting onboarding and technical discussions on frontend architecture.

Frameworks and libraries: Vue 3 (Composition API), Axios, Pinia

Languages: HTML5, CSS3/SCSS, JavaScript (ES6+), TypeScript

Styling: Tailwind CSS v4

Tools: Anthropic Claude, GitHub, Postman, Swagger, Prism, JWT, JIRA

Delasport | www.delasport.com

Mid Front-end Developer

Front-end Developer

Sofia / Varna, Bulgaria

August 2024 – April 2025

September 2020 – July 2024

- Working on large-scale, high-performance SPA serving B2B and B2C markets in dedicated Agile Teams.
- Handling business requests in terms of logic (troubleshooting and fixing bugs) and continuously improving the UX/UI of the core project of the company. Providing a variety of possible solutions per task, a list of needed resources, ETA of implementation, and handing over all required deliverables within deadlines.
- Collaborated with cross-functional teams to implement Responsively Designed Web-based solutions.
- Worked closely with Back-end Developers to communicate with REST APIs and endpoints.
- Worked on the legacy part of the project (Backbone.js) to improve functionality, as well as improve or implement new features using Vue 2 (Options API), Vue 3 (Composition API), JavaScript, and TypeScript.
- Delivering Front-end implementations of XD/PSD/Figma and even .pdf files to “pixel-perfect” designs and redesigns on clients’ websites, ensuring that both design and functionality are seamlessly integrated.
- Integrating Google Analytics (GA4) on the client’s websites on demand.
- Collaborated with other internal Front-end Teams to keep the company's product quality at the highest level.
- Optimizing company products for maximum speed, scalability, and performance.
- Ensuring cross-browser, cross-platform, and device compatibility.
- Writing clean, maintainable, and well-documented code following the internal and industry best practices.
- Documenting internal processes, workflows, and writing new feature guidelines.
- Onboarding and mentoring Junior Front-end teammates.
- Conducting code reviews for teammates’ code solutions.

Frameworks and libraries: Vue 2 (Options API), Vue 3 (Composition API), Vue Router, Vuex, Axios

Languages: HTML5, CSS3/SCSS, JavaScript (ES6+), jQuery, TypeScript

Styling: Tailwind CSS v3 (side projects in the company), Bootstrap v4.1.0

Tools: Git, Bitbucket, JIRA, Gulp, Photoshop 2024

Project specifics: PHP, Symphony, Twig

Economedia | www.economedia.bg

Front-end Developer

Sofia, Bulgaria

September 2019 – August 2020

- Handling different requests from the business in terms of logic and continuously improving the UX/UI of the core project of the company. Providing a variety of possible scalable and maintainable solutions for each task, needed resources, ETA of implementation, and all required deliverables promptly.
- Collaborated with cross-functional teams to implement Responsively Designed Web-based solutions.
- Worked closely with Back-end Developers to communicate with REST APIs and endpoints.
