Frontend Developer with 6+ years of professional experience building scalable, responsive web applications, with strong production experience in Vue and JavaScript/TypeScript. Specialized in Vue 3 (Composition API), Nuxt 4, Pinia, TypeScript, Vite, Vitest, and Tailwind CSS 4, REST APIs, testing, performance optimization, accessibility, and cross-browser and cross-platform compatibility. Experienced in collaborating across frontend, backend, product, and design teams, contributing to frontend architecture, code quality, and development practices. Strong focus on clean, maintainable code and practical solutions that balance technical quality, user experience, and business requirements.

Skills

Frontend: Vue 3 (Composition API), Nuxt 4, JavaScript (ES6+), TypeScript, HTML5, CSS3
State & Architecture: Pinia, Vuex, Vue Router, Vue Composables, Component-Based Architecture
Testing & Build: Vitest, Vite
Development Tools: Git, GitHub, Bitbucket
API & Backend: REST APIs, Axios, Firebase, Postman, Swagger, Prism
Styling: Tailwind CSS 4, SCSS, Bootstrap 5.3
Design & Collaboration: Photoshop, Adobe XD, Figma, JIRA
Practices: Responsive Web Design, Accessibility, Cross-Browser & Cross-Platform Compatibility, Performance Optimization, SEO, Code Review, Agile/Scrum

Experience

SBT Solution | www.sbtsolution.com Varna, Bulgaria
Frontend Developer (AI Team, later IT Team) February 2026 – June 2026

- Built fully responsive web solutions using Vue 3 (Composition API) and TypeScript/JavaScript, including dashboards, admin panels, AI tool interfaces, and full websites with Nuxt 4.
- Integrated frontend applications with REST APIs, state management, and JWT-based authentication flows.
- Created reusable components following established development practices to support scalability and maintainability.
- Maintained, refactored, and optimized existing projects, improving code quality and performance.
- Collaborated with backend and product teams to deliver features end-to-end and ensure stable data flow.
- Improved UX, accessibility, and cross-browser and cross-platform compatibility across key user flows.
- Participated in code and UX reviews and documented frontend processes, components, projects, and guidelines.
- Wrote clean, maintainable, well-documented code according to internal standards and best practices.

Technologies used: Vue 3 (Composition API), Nuxt 4, Pinia, Axios, TypeScript, JavaScript, Tailwind CSS 4, REST APIs, JWT, Git, GitHub, Anthropic Claude, Postman, Swagger, Prism, JIRA

Delasport | www.delasport.com Sofia / Varna, Bulgaria
Mid Frontend Developer August 2024 – April 2025
Frontend Developer September 2020 – July 2024

- Worked on a large-scale, high-performance SPA serving B2B and B2C markets within Agile teams.
- Worked on the legacy Backbone.js codebase to improve functionality and implement new features using Vue 2 (Options API), Vue 3 (Composition API), JavaScript, and TypeScript.
- Handled business requests involving application logic, troubleshooting, and bug fixing, while continuously improving the UX/UI of the company's core project. Provided multiple solutions for each task, including pros and cons, required resources, implementation estimates, and all necessary deliverables within deadlines.

- Worked closely with backend developers to integrate frontend applications with REST APIs.
- Optimized company products for speed, scalability, and performance while ensuring cross-browser, cross-platform, and device compatibility.
- Delivered pixel-perfect frontend implementations of XD, PSD, Figma, and PDF designs and redesigns for client websites, ensuring seamless integration of design and functionality.
- Collaborated with cross-functional teams to implement fully responsive web-based solutions.
- Integrated Google Analytics (GA4) on the client's websites on demand.
- Collaborated with other internal frontend teams to maintain a high level of product quality across the company.
- Documented internal processes, workflows, and feature guidelines; participated in onboarding and mentoring junior frontend teammates and conducted code reviews.

Technologies used: Vue 2 (Options API), Vue 3 (Composition API), Vue Router, Vuex, Axios, JavaScript (ES6+), jQuery, TypeScript, Tailwind CSS 3, Bootstrap 4.1.0, Git, GitHub, Bitbucket, JIRA, Gulp, Photoshop 2024

Economedia | www.economedia.bg Sofia, Bulgaria
Frontend Developer September 2019 – August 2020

- Collaborated with design, backend, and product stakeholders to deliver fully responsive, business-critical features for a high-traffic Bulgarian news portal (www.dnevnik.bg) and its subsidiary websites.
- Implemented Google AMP pages and SEO optimizations to improve search visibility and rankings.
- Optimized page load times and site performance across high-traffic pages for the main and subsidiary projects.
- Delivered pixel-perfect redesigns and new features for www.dnevnik.bg and its subsidiary websites.
- Partnered with backend engineers to consume REST API endpoints, keeping content and data in sync.
- Handled business requests involving application logic and continuously improved the UX/UI of the main company project. Provided a variety of scalable and maintainable solutions for each task, along with required resources, implementation estimates, and all necessary deliverables within deadlines.
- Prioritized cross-browser and cross-device support to keep the UX consistent for a broad, high-traffic audience.
- Wrote clean, maintainable, and well-documented code following team conventions and industry best practices.

Technologies used: HTML5 · CSS3 · Bootstrap 4.1.0 · JavaScript · jQuery · SEO · AMP · Git
Projects: www.dnevnik.bg (main) | www.karieri.bg | www.capital.bg | www.bacchus.bg | www.regal.bg
